## Description

---

The Eagle 4 Drum Modular Spill Containment Platform model 1645 is constructed of yellow high-density polyethylene (HDPE) for excellent durability and chemical resistance. It features a sump capacity of 66 gallons (250 liters) and measures 51.25W x 51.25D x 7.75H. To assist with cleaning operations, this spill deck includes a drain and easily removable black HDPE flat top grating.

Eagle 4 drum spill containment deck with drain, model 1645, weighs 67 pounds, with a load capacity of 8000 pounds. The modular design allows for multiple configurations with other Eagle spill pallets, using the built-in U-channels. Fork lift pockets make it easy to relocate throughout your facility, and its square shape is ideal when space is limited.

Model 1645 is a safe and efficient method of storing up to 4 drums in the workplace while meeting SPCC and EPA requirements for secondary containment. Use with the Eagle [poly pallet ramp model 1689](#) for easier loading and unloading.
